**GENERAL INFORMATION:** When VESTA is applied at recommended rates to the soil, stimulates soil microbial activity. The presence of agricultural minerals and increased soil microbial activity leads to more efficient nutrient cycling and uptake by the plant, which may accelerate root development and lead to increased plant vigor, crop quality and yield.

**DIRECTIONS FOR USE:** VESTA is most effectively applied through irrigation water. VESTA can be effectively applied through any irrigation system, including drip, micro-sprinkler, sprinkler, center pivot, furrow and flood. VESTA can also be sprayed directly on the soil surface or shanked immediately preceding irrigation.

**MIX OR AGITATE BEFORE APPLYING PRODUCT.**

**GENERAL SOIL RATES:** Apply 30 to 60 gallons of VESTA per acre per season. Applications should be made at regular intervals through alternating irrigations. Rates and application timing varies for specific crops and soil conditions. Contact the **SOBEC Corporation** for specific recommendations.

**FOLIAR:** VESTA is an excellent carrier and compatible with most foliar nutrients. Use 4 to 6 gallons per acre depending on foliage density.

**PRECAUTIONS:** Caution - Do not ingest. Wash hands after using product. If swallowed: Call a poison control center or doctor for treatment advice. If in eyes: Hold eye open and rinse slowly and gently with water. If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water.
